## 1 Casement System

Casement windows are hinged on one side and open outward to the right or left. It effortlessly opens and closes with a special crank that can be folded away when not in use. It is commonly used above kitchen sinks or a bathtub. Casement windows can offer you excellent energy efficiency compared to other American window profile systems. When screens are included, they are placed on the interior side of a window.

## 4 Single-Hung System

The Single-Hung window sash can be lifted only from the bottom. The main difference compared to the Double-Hung window is that the Single-Hung has a fixed glazing in the upper part. As a consequence of it, they are very energy efficient and easy to operate.

## 2 Patio Door System

Sliding Door system. Include a strong and long lasting patio door in your home with increased security features. Patio doors slide open horizontally, so they require less space to operate. Through large panels of glass we can create bright and airy spaces with a large amount of natural light. Compared to other American window systems, it is highlighted by a higher safety standard. It can be used in both traditional and modern architecture.

## 5 Double Slide System

Sliding windows open horizontally from one side to another. While moving on a track, they do not require any extra space to operate. Sliding windows are commonly used in tight walkways, porches and patios. It can offer controlled and smooth access to fresh air. They are made out of our unique vinyl formula and are performance tested for outstanding weathering, color retention and durability.

## 3 Double-Hung System

The Double-Hung window can be lifted from the bottom or lowered from the top with two independent sashes. They are easy to clean as both of the sashes tilt inward for simple access to the exterior and interior panes of glazing. Double-Hung windows do not require any extra space to operate, so they can maximize both interior and exterior space.

## 6 EURO 82 System

In Europe, energy costs are much higher than in America. This has made Europeans pay more attention to saving energy in their homes. Meet the EURO 82 system, a leading European window profile solution known for its remarkable thermal efficiency. Offering a harmonious blend of superior thermal performance, stylish design, and reasonable pricing, it is the ideal choice for those seeking optimal thermal parameters that align with modern building standards.
